Kapp Alloy & Wire Purchases New Equipment

OIL CITY, PA, Nov. 18, 2010 – Kapp Alloy & Wire, a leading solder, spraywire, and Babbitt manufacturer located in Oil City, PA, has recently purchased new cold welding equipment. The new equipment purchase follows the launch of a new company website and increased employment over the past year.

“We’re proud to be a growing business in the Oil Region,” said Kapp Alloy’s president, Jack Crawford. “This new cold welding process seamlessly joins wires without melting the wire. This improves efficiency, while preserving the unique properties of our Precision Microcast™ solder and Babbitt.”

About Kapp Alloy & Wire

For over 60 years Kapp Alloy & Wire has manufactured the highest quality solder and Babbitt. Whether producing custom alloys and fluxes for aluminum soldering on NASA’s Apollo missions, or new standard alloys for today’s lead-free electronics, Kapp’s unique Precision Microcasting™ process yields unparalleled high purity solder.

Improved soldering efficiency, less downtime and cleanup, and fewer rejected parts create a higher quality final product and a more consistent performance – culminating in real savings for Kapp customers. For more information on Kapp Alloy & Wire’s products and capabilities, please contact Jack Crawford at 800.327.6533 or jack@kappalloy.com
